

Rate LGA's effectiveness on ENVIRONMENT / WATERSHED PROTECTION - (e.g., monitor water quality, lake levels, insect control, use of chemicals, protect lake's shoreline, fish and wildlife)

County	Full Time/Part Time	Rating	Comments
Northampton	Part Time	Good	Lake Gaston could be a great largemouth bass fishery if it had more "structure and beneficial weed growth .. in areas that wont interfere with homeowners, boating, skiing or safety. There are plenty of locations. Its really just a catfish and rock bass lake now. Missing out on visiting fisherman and their families making this a destination.
Northampton	Full Time	Poor	PROPERTY VALUES DECREASE AS THE WEED POPULATION INCREASES WITH THE BLESSING OF OVER-ZEALOUS ENVIRONMENTALISTS
Northampton	Full Time	Fair	The use of chemicals around and near (and in) the lake is still rampant.
Halifax	Part Time	Poor	Our cove has been overrun recently (past few years) with hydrilla and lyngbya inspite of PLM treating the water according to their supposedly effective routines. Something has to be done about the lyngbya; it is the worst water hazard I have ever encountered!
Warren	Part Time	Excellent	Wally does a wonderful job. Especially love the e-coli kits
Warren	Full Time	Good	I think surf and wake boats are allowed to beat our shorelines. We see no hydrilla and weed support in the King Branch area.

Warren	Full Time	Poor	The lake is being ruined by irresponsible boating people with wakes in coves by tearing up riprap, and property yet nothing is being done. Continued spraying with chemicals is causing more harm than good. The if it wasnt invented here attitude is causing serious damage to the lake by causing new weeds to grow. No one seems to use the experience of what has been done in other lakes instead they just throw money and chemicals in the water. Absolutely little to no control over boat traffic. No control over Dominion and water flown. No control over weeds and grass carp.
Warren	Full Time	Unsure	again, no wake areas in coves less than 100 across adn around docks would help all home owners in keeping the banks intack. unless county would pay for the shoreline riprap
Warren	Part Time	Poor	New water management plan is awful! Frequent very high levels. What does Quasi River Run mean?
Warren	Full Time	Unsure	My understanding that you gave Dominion the okay to allow the lake levels to be over 199. The level they go to now in the spring is over our dock which is not good especially when wakeboard lessons take place on lizard creek.
Warren	Full Time	Prefer Not to Answer	SEe previous statement !
